<b>PERSONAL DATA</b>	Place of Birth: Shandong, China Date of Birth: 15/10/1991 Affiliation: Pengcheng Lab Personal Webpage: <a href="https://chriszhengce.github.io/index.html">https://chriszhengce.github.io/index.html</a> Phone: +86 13335281561 +33 06 19 02 31 59 Email: zhengc@pcl.ac.cn chriszhengce123@gmail.com chriszhengce123@163.com
<b>WORKING EXPERIENCE</b>	<b>Department of Broadband Communication, Pengcheng Lab, China</b> 09/2024 - now Assitant Professor
	<b>LTCI, Télécom Paris, France</b> 07/2023 - 09/2024 Postdoctoral Researcher
	<b>R&amp;D Center, Sony (China) Limited, China</b> 08/2021 - 06/2023 Wireless Researcher/ Research Scientist, <b>3GPP SA2</b> Sony Delegate (from May 2022) Research and Development Center, Beijing, SONY
	<b>IEMN-CNRS, France</b> 10/2017 - 10/2020 Research PhD student, Laboratory: IRCICA - Research Institute on software and hardware devices for information and Advanced communication - USR 3380 du CNRS, Lille, France
<b>Ph.D. THESIS</b>	"Impulsive and Dependent Interference Modeling in IoT Networks", funded by AR-Burst
<b>EDUCATION</b>	<b>University of Lille, France</b> , 10/2017 - 03/2021 Ph.D. in Wireless Communication, School of Micro and nano technologies, acoustics and telecommunications Supervisor: <b>Laurent CLAVIER, Malcolm EGAN, Jean-Marie GORCE</b>
	<b>Aalborg University, Denmark</b> , 09/2019 - 12/2019 Visiting Ph.D. Guest, Department of Electronics Host Professors: <b>Troels PEDERSEN, Petar POPOVSKI (IEEE Fellow)</b>
	<b>Xi'an Jiaotong University, China</b> , 09/2013 - 07/2016 M.E in Electronics and Communication Engineering, School of Electronics and Information Engineering Supervisor: <b>Xinmin LUO</b>
	<b>Harbin Institute of Technology</b> , 09/2009 - 07/2013 B.E in Communication Engineering, School of Electronics and Information Engineering

**SUMMER &  
WINTER  
SCHOOLS**

**CITIlab, INSA Lyon , University of Lyon, France,** 18/11/2018 - 22/11/2018  
1st Winter School on Information Theory and Signal Processing for Internet of Things

**University of Tokushima, Japan,** 07/2014 - 08/2014  
The Electrical and Information Science Course Program

**University of California Los Angeles, USA,** 02/2014 - 03/2014  
American Language Center Intensive English Communication Program

**HONORS  
&AWARDS**

**Mobility Grant,** 09/2019 - 12/2019  
Support of visit to Aalborg University in Denmark,  
University of Lille, France

**IRACON 5th TS Grant,** 12/2019  
Training schools held in Lyon,  
The Inclusive Radio Communications (IRACON)

**Graduate Scholarship,** 2013 - 2016  
Second Class National Award (waiver of tuition and monthly living stipend),  
Xi'an Jiaotong University China,

**PUBLICATIONS Journal Papers:**

[J8]. **Ce Zheng**, Ke Zhang, Sun Chen, Wenqi Zhang, Qiong Liu, Angesom Ataklity Tesfay. “Fast Collaborative Inference via Distributed Speculative Decoding”, *Journal of Information and Intelligence* (2026).

## SEMINARS & PRESENTATIONS

**Rome** (29/05/2023), *A General Solution for Straggler Effect and Unreliable Communication in Federated Learning*, IEEE International Conference on Communications

**Online** (11/04/2022), *Stochastic Resource Allocation for Outage Minimization in Random Access with Correlated Activation*, IEEE Wireless Communications and Networking Conference

**Online** (30/11/2021), *Choosing a proper starting point in SGD by exploiting dependence between features — an intuition from resource allocation in event triggered communication*, Sony AI Conference, SONY

**Online** (22/05/2020), *Linear Combining in Dependent  $\alpha$ -Stable Interference*, IEEE International Conference on Communications

**AALBORG** (13/11/2019 and 27/11/2019), *Copula Theory in Communication Society*, invited talk and hosted by Professor Petar POPOVSKI and Professor Troels PEDERSEN, Department of Electronics, Aalborg University, Aalborg, Denmark

**AALBORG** (30/09/2019 and 03/10/2019), *Modeling Impulsiveness and Dependence of Interference in Wireless Communication Network*, invited talk and hosted by Professor Troels PEDERSEN and Professor Petar POPOVSKI, Department of Electronics, Aalborg University, Aalborg, Denmark

**GUANGZHOU** (30/05/2019), *Interference Modeling for Wireless IoT Networks*, invited talk and hosted by Professor Li CHEN and Dr. Ting-yi Wu, School of Electronics and Communication Engineering, Sun Yat-sen University, Guangzhou, China

**Shanghai** (10/06/2019), *Copula-Based Interference Models for IoT Wireless Networks*, IEEE International Conference on Communications

**RENNES** (06/03/2019), *Modeling Interference with  $\alpha$ -stable and Copulas*, ARBurst Project meeting, ITER Lab, Rennes, France

**LYON** (11/10/2018), *Modeling of Dependence in Impulsive Interference and Copula Theory*, ARBurst Project meeting, CITI-lab, Lyon, France

**LILLE** (12/06/2018), *Dependent Impulsive Interference modeling*, Seminar on ‘Math-

ematics and IoT', IRCICA Lab, Lille, France

**RENNES** (14/02/2018), *Copula Theory and Dependence in Interference*, ARBurst Project meeting, ITER Lab, Rennes, France

**RESEARCH &  
PROJECT  
EXPERIENCE**

**SEAWave and GOLIAT**

now

Monitor radiofrequency electromagnetic fields (RF-EMF) exposure, particularly from 5G, provide novel insights into its potential causal health effects.

SEAWave is funded by **Horizon Europe** and SERI (Switzerland);

GOLIAT is funded by **Horizon Europe research and Innovation program**.

**SONY and Tai'shan Medical Center Coresearch Project**

2023

**Responsibility:** Collaboration with medical staffs from Tai'shan Medical Center on wireless sensing technologies for vital signs (e.g. heartbeat and breath), elderly fall, device-free activity recognition, etc.

**SONY and Tsinghua Coresearch Project (450,000 RMB)**

2023

**Responsibility:** Supervise 6 Ph.D student in Tsinghua University and output 4 patents for 3GPP standards.

**SONY and Tsinghua Coresearch Project (600,000 RMB)**

2022

**Responsibility:** Supervise 6 Ph.D student in Tsinghua University and output 4 patents for 3GPP standards.

**SONY and Tsinghua Coresearch Project (600,000 RMB)**

2021

**Responsibility:** Supervise 6 Ph.D student in Tsinghua University and output 3 patents for 3GPP standards .

**Impact of impulsive and dependent interference on radio communications** (fully funded by ANR project ARBurst in collaboration with INSA/CITI Lyon, INSA/IETR Rennes and IRCICA Lille.) 10/2017 - 06/2021

**Responsibility:** - Model interference and essentially the dependent and impulsive case. Capacity has to be revisited under the impact of dependence on capacity. Other metrics will be necessary for the bursty communications and lead to multi-object optimization.

**TEACHING  
EXPERIENCE**

**Teaching Assistant**

INFT 3037 Stochastic Signal Analysis

09/2014 - 01/2015

INFT 3036 Communication Principals

02/2014 - 07/2014

**RESEARCH  
SKILLS**

Matlab, Python, Pytorch, Pandas, Latex, Stochastic Geometry, Copula Theory,  $\alpha$ -stable, Markov Decision Process, Federated Learning, AI, 3GPP

**Languages**

Mandarin (Native)

English (Proficiency)

French (Beginner)

Japanese(Beginner)

## Research and Skills Related to LLM

**Certificate** **Generative AI for Everyone** on Coursera 01/2024

In this course, I learned:

1. What generative AI is and how it works, its common use cases, and what this technology can and cannot do.
2. How to think through the lifecycle of a generative AI project, from conception to launch, including how to build effective prompts.
3. The potential opportunities and risks that generative AI technologies present to individuals, businesses, and society.

This will be helpful for the implementation of LLMs.

**Patent** **Ce Zheng**, Chen Sun. “A performance improvement and UE selection scheme based on sidelink enhancement in federated learning”. Application No: 202310436139.X

In this patent, we introduced a new solution to the unreliable communication problem in distributed learning network. The bottleneck of uplink transmission is mitigated by exploiting the D2D or sidelink communication. Combing with gradient coding or coded computation, this may enhance the training performance of distributed learning network, especially for the case of on-device LLM.

This will be helpful for the deployment of LLMs on devices.

**Project** **SEAWave** Scientific-Based Exposure and Risk Assessment of Radiofrequency and mm-Wave Systems from children to elderly (5G and Beyond).

This project mainly focuses on the data processing and analysis of the Electromagnetic-Field (EMF) exposure data: data collection, data cleaning, data integration, data transformation, data reduction, data sampling, data modeling, data interpretation, data exploration and visualisation, etc. The work is mainly done using Python library — Pandas.

This will be helpful for the data preprocessing of LLMs.

**INDUSTRIAL CONTRIBUTION** The experience of editing and writing technical documents and white papers:

1. The 3rd Generation Partnership Project (3GPP) Tdoc: SA2 152#E: S2-2206122 — Solution for KI#4 & KI#7: 5GS Assistance to Federated Learning Operation (Handover in Hierarchical Federated Learning)
2. China Communication Standardization Association (CCSA) White paper: Research on the next generation of wireless communication and network architecture towards native AI, Chapter 6.2.1.

This will be helpful for enhancing the performance and usefulness of Large Language Models (LLMs) in standardization.
